

EXP NO: 3

SETTING UP EPICS, FEATURES, AND USER STORIES FOR PROJECT PLANNING

Aim:

To learn about how to create epics, user story, features, backlogs for your assigned project.

Create Epic, Features, User Stories, Task

The screenshot shows the Azure DevOps interface for a project named 'Student Data Management System Team'. The left sidebar contains navigation options: Overview, Boards, Work Items, Backlogs (selected), Sprints, Queries, Delivery Plans, Analytics views, Repos, Pipelines, Test Plans, and Artifacts. The main area displays a backlog table with columns: Order, Work Item Type, Title, State, Effort, Business Area, Value Area, and Tags. The table lists several work items, including Epics like 'User Authentication & Access Control', 'Student Profile & Records Management', 'Course & Enrollment Management', 'Attendance & Academic Activities', and 'Results, Reports & Analytics'. Under the 'User Authentication & Access Control' epic, there are features and user stories, such as 'Student & Faculty Login' and 'Forgot Password & Reset'.

Order	Work Item Type	Title	State	Effort	Business Area	Value Area	Tags
1	Epic	User Authentication & Access Control	New		Business		
	Feature	Student & Faculty Login	New		Business		
	User Story	As a user, I want to log in using email and password s...	New		Business		
	User Story	As a user, I want my session to remain active so that I ...	New		Business		
	Feature	Forgot Password & Reset	New		Business		
	User Story	As a user, I want to reset my password if I forget it so t...	New		Business		
	User Story	As a user, I want to set a new secure password so that ...	New		Business		
2	Epic	Student Profile & Records Management	New		Business		
3	Epic	Course & Enrollment Management	New		Business		
4	Epic	Attendance & Academic Activities	New		Business		
5	Epic	Results, Reports & Analytics	New		Business		

1.Fill in Epics

The screenshot shows the 'Details' view of an Epic work item titled '11 User Authentication & Access Control'. The left sidebar is the same as the previous screenshot. The main area is divided into several sections: Description, Discussion, Planning, Classification, Deployment, Development, and Related Work. The 'Description' section has a placeholder 'Click to add Description.' The 'Discussion' section has a text input field with a hint: 'Add a comment. Use # to link a work item, @ to mention a person, or ! to link a pull request.' The 'Planning' section includes fields for Priority (2), Risk, Effort, Business Value, Time Criticality, Start Date, Target Date, and Target Date. The 'Classification' section shows the Value area as 'Business'. The 'Deployment' section has a note about tracking releases. The 'Development' section has a note about linking an Azure Repos commit, pull request, or branch. The 'Related Work' section has a note about adding an existing work item as a parent and lists a child item '15 Forgot Password & Reset'.

Description

Click to add Description.

Discussion

Add a comment. Use # to link a work item, @ to mention a person, or ! to link a pull request.

Planning

Priority: 2

Risk

Effort

Business Value

Time Criticality

Start Date: Select a date...

Target Date: Select a date...

Classification

Value area: Business

Deployment

To track releases associated with this work item, go to [Releases](#) and turn on deployment status reporting for Boards in your pipeline's Options menu. [Learn more about deployment status reporting](#)

Development

Add link

Link an Azure Repos [commit](#), [pull request](#) or [branch](#) to see the status of your development. You can also [create a branch](#) to get started.

Related Work

Add link

Add an existing work item as a parent

Child

15 Forgot Password & Reset

2.Fill in Features

The screenshot displays the Azure DevOps interface for a project named "Student Data Management System". The left sidebar shows the navigation menu with options like "Boards", "Work Items", "Backlogs", "Queries", "Deliverables", "Analysis", "Repos", "Pipelines", "Test", and "Artifacts". The main area shows a work item titled "12 Student & Faculty Login" under "FEATURE 12". The work item is in the "New" state, with "Area" set to "Student Data Management System" and "Iteration" set to "Student Data Management System\Sprint 1". The "Description" field is empty, with a placeholder "Click to add Description.". The "Discussion" section shows a comment box with a placeholder "Add a comment. Use # to link a work item, @ to mention a person, or ! to link a pull request." and a "switch to Markdown editor" link. The "Planning" section includes fields for "Priority" (2), "Risk", "Effort", "Business Value", "Time Criticality", "Start Date", and "Target Date". The "Classification" section includes "Value area" (Business). The "Deployment" section includes a "To track releases associated with this work item, go to Releases and turn on deployment status reporting for Boards in your pipeline's Options menu. Learn more about deployment status reporting" link. The "Development" section includes an "Add link" button and a "Link an Azure Repos commit, pull request or branch to see the status of your development. You can also create a branch to get started." link. The "Related Work" section includes an "Add link" button and a "Parent" link to "11 User Authentication & Access Control" (Updated Mar 20, New).

3.Fill in User Story Details

The screenshot displays the Azure DevOps interface for a project named "Student Data Management System". The left sidebar shows the navigation menu with options like "Boards", "Work Items", "Backlogs", "Queries", "Deliverables", "Analysis", "Repos", "Pipelines", "Test", and "Artifacts". The main area shows a work item titled "13 As a user, I want to log in using email and password so that I can securely access the system." under "USER STORY 13". The work item is in the "New" state, with "Area" set to "Student Data Management System" and "Iteration" set to "Student Data Management System\Sprint 1". The "Description" field contains the text "Allow registered users to authenticate into the portal.". The "Acceptance Criteria" section contains the text "Login via email/password; password hashing enabled; error shown for invalid credentials.". The "Discussion" section shows a comment box with a placeholder "Add a comment. Use # to link a work item, @ to mention a person, or ! to link a pull request." and a "switch to Markdown editor" link. The "Planning" section includes fields for "Story Points", "Priority" (2), and "Risk". The "Classification" section includes "Value area" (Business). The "Deployment" section includes a "To track releases associated with this work item, go to Releases and turn on deployment status reporting for Boards in your pipeline's Options menu. Learn more about deployment status reporting" link. The "Development" section includes an "Add link" button and a "Link an Azure Repos commit, pull request or branch to see the status of your development. You can also create a branch to get started." link. The "Related Work" section includes an "Add link" button and a "Parent" link to "12 Student & Faculty Login" (Updated Mar 20, New).

Result:

Thus, the creation of epics, features, user story and task has been created successfully.
